

Lakeside Community Council

Minutes from November 29, 2005: 7:00-9:30 P.M.

Board Members: Relda Castles, Janet Heinze, David Reynolds, Gregg Schoh, Jerry Thornburg and Bruce Young were all present.

Old Business began with the Ben Williams Park with no new information to update.

Wallace Best gave an update on the Eagle Transit. He is continuing to work toward a 5-day a week pickup in the Lakeside community and asking for cooperation from Waterside Condos for use of their park bench. It was also voted to write a letter to the County Commissioners asking them why the EagleTransit service was terminated and request that they help us reestablish this service to the Lakeside Community if possible.

Jerry Thornburg gave the Board an update on his finding regarding Incorporation for Lakeside. Thornburg was requested to continue on the Fact Finding after presenting new information regarding a 500 population per 1 square mile as being the legal basis for Incorporating.

New Business began with Traci Sears-Tull from the Flathead County Planning and Zoning Office presenting a request by Montana Mapping Associates on behalf of David Carpenter for preliminary approval of the Resubdivision of Lot 12 of Eagle Crest Bluffs. The property is located at 1143 Trappers Creek in Lakeside. The request was approved unanimously to create a two (2) lot single-family residential subdivision on 10.85 acres. Traci Sears-Tull duly noted Bruce Young's concerns with turning traffic into the subdivision since they continue to make requests and are approved for more lots than was initially approved, thus creating a great population density.
